

The screenshot displays the RStudio integrated development environment (IDE) with the following components:

- Script Editor:** Contains an R script with the following code:

```
1 num1<-as.integer(readline(prompt = "enter the first number:"))
2 num2<-as.integer(readline(prompt = "enter the second number:"))
3 num1-num2/num1
4 print(num2)
5
6
```
- Environment Pane:** Shows the current environment with the following variables:

Variable	Value
num1	10870L
num2	110
num3	11867
- Console:** Displays the output of the script execution:

```
> source("~/active-rstudio-document")
enter the first number:10870
enter the second number:110
[1] 11867
>
```
- Terminal:** Shows the command prompt with the following commands and output:

```
> source("~/active-rstudio-document")
enter the first number:10870
enter the second number:110
[1] 11867
>
```
