

The screenshot displays the RStudio integrated development environment (IDE) interface. The main window is divided into several panes:

- Source Editor:** Contains an R script with the following code:

```
1 num1 <- as.integer(readline(prompt = "Enter the first number:"))
2 num2 <- as.integer(readline(prompt = "Enter the second number:"))
3 num1+num2
4 print(num2)
5
6
```
- Environment Pane:** Located on the right, it shows the current environment with the following variables:

Variable	Value
num1	1000L
num2	87L
num3	1087L
- Console:** Located at the bottom, it shows the execution of the script:

```
> source("~/active-rstudio-document")
Enter the first number:1000
Enter the second number:87
[1] 1087L
```
