

The screenshot displays the RStudio integrated development environment (IDE) with the following components:

- Source Editor:** Contains an R script with the following code:

```
1 num1 <- as.integer(readline(prompt = "enter the first number:"))
2 num2 <- as.integer(readline(prompt = "enter the second number:"))
3 num1 - num2
4 print(num1)
```
- Environment:** Shows the current environment with the following variables:

num1	num2
2000	1986
- Console:** Shows the output of the script execution:

```
> source("C:/Users/active-rstudio/.Rprofile")
enter the first number:2000
enter the second number:1986
[1] 14
```
